NALGONDA-S08001, TELANGANA

SUMMARY

I am a passionate AI/ML and Full Stack Developer who enjoys building innovative, real-world technology solutions that solve meaningful problems. My interests include artificial intelligence, healthcare technology, automation systems, accessibility-focused applications, smart IoT devices, and interactive web development. I have developed multiple projects including AI-powered healthcare systems, smart automation platforms, intelligent gaming applications, and responsive full stack web applications using modern technologies like React, Node.js, Python, TensorFlow, MySQL, and OpenCV. My goal is to create impactful software that combine innovation, design, and intelligence to improve everyday life and solve real-world challenges through technology.

EDUCATION

Engineering in Computer Science & Engineering | 08/2023 - 04/2027
Kalasalingam Academy of Reserch and Education

Intermediate in MPC | 06/2021 - 05/2023
Naryana Junior Collage

10th | 06/2019 - 05/2020
Murthy Concept School

SKILLS

Python	Java	Problem Solving	HTML	CSS	JavaScript
React JS	Tailwind CSS	Web Application Design			

PROJECTS

Life Pulse - Smart Blood Donation System | 07/2025 - 11/2025
Connects blood donors, hospitals, and receivers for emergency blood needs.

- Developed a full-stack web application to connect blood donors, hospitals, and receivers during emergencies.
- Implemented donor search and emergency request system with a responsive UI.
- Built using React, Node.js, and MySQL for real-time data handling.

AI Hen Disease Detection System | 02/2026 - 04/2026
Detects poultry diseases using AI-based image classification.

- Built a derep learning-based poultry disease detection system using image classification.
- Used Python, TensorFlow, and OpenCV for model training and prediction.
- Helps farmers identify diseases early and improve poultry health management.

Smart Hen Incubator | 02/2026 - 04/2026
Smart hatching system that monitors and maintains ideal incubation conditions.

- Designed an IoT-based automated incubator system.
- Monitors and controls temperature and humidity using sensors.
- Ensures optimal conditions for egg incubation with mainual manual effort.

Mind-Match Pro | 04/2026 - 05/2026
AI-based Tic Tac Toe game with smart opponent logic.

- Developed a Interactive Ai-powered Tic Tac Toe game.
- Implemented smart opponent logic for challenging gameplay.
- Built using React and JavaScript with responsive UI design.

COURSES

NEXTWAVE
NextWave CCBP 4.0 Full Stack Development Program - NXT Wave

Web Development (HTML, CSS, JavaScript, React, Node.js, MySQL)

STRENGTHS

- Team Leadership**
Experience leading and coordinating teams on technical projects.
- Adaptability**
Quick to learn and apply new technologies in dynamic environments.
- Problem Solving**
Ability to analyze issue and implement an effective solution

KEY ACHIEVEMENTS

Web Development Achievements
Built full-stack applications using React, Node.js, and MySQL, designed responsive UIs with HTML, CSS, and JavaScript, Integrated REST APIs for real-time data handling, developed AI and IoT-based web projects, created interactive web apps and games, and strengthened debugging and problem-solving skills through hands-on development.

INTERESTS

Web Development
Passionate about building responsive and user-friendly web applications

Business
Interested in understanding business ideas, startups, and real-world problem solving through
